

Hello my name is Devin LaTroy Hester, that name may not mean very much to you or anybody right now but it very well should. I am the reason behind the internet at least the social aspect of it. I know this Mark Zuckerberg character seems to get all the fame and glory for something that I did back in 1998. I would love to have a conversation with him and get a clear understanding of his logistics of how, when and where did his concept arise as I know completely where and how everything was **born** from. During those early years 1998 through 2000 I was doing everything NO other man on the planet was even thing about, but that is neither here nor there now but I was contacted by some big league players like AT&T and Alltel. It was around that time that I told them that it would be best to switch up from cell phone towers to satellites. First let me state that at that particular time that I was one in a million meaning that my iq was off the rector scale also having researched my family tree surprisingly enough I wasn't like all the other African American kids I was the closets kin to Jesus Christ almighty himself. Once I found that out it was a bit much to bear but I tried to use it for the greater good hence the *internet* and social media. However I'm sure that Mark also has such a compelling story but honestly I'm really not going after the facebook or twitter this is about all the funds that I had accumulated that was stolen from said internet. As you can imagine after creating both said apps I was able to watch money pour like a fountain into my one of many brokerage accounts. Regency whom then turned into Regal finance where at that time they forgot my name and account and couldn't do anything. I thought thats okay I will just focus on building up Twitter who I was partnered up with another person but obviously they weren't a friend. It was around August 2005 is where they tried to put the nail in the coffin where my body shut down and was deemed a severe stroke. I hate to call blame on the innocent but in this case I had enrolled in the

US military where they created my own specific branch that was tailored around me. See I was never able to do anything physical because of my blood type not being able to carry sufficient oxygen all through out my body. I also studied blood and cures but again that not what this letter is about. So after two hip replacements and a tracheotomy I awoke with a completely different body and felt like I had been soulfully rape of everything that made me. Luckily I still had my internet accounts that where touched but still could be salvaged. So being bed ridden I took that time and spent it wisely and found out that the facebook had been officially taken from me and astonishingly my memory dealing with it too. Anyhow I was then contacted by an old friend Phillip Scott, who was my legal business associate and wanted to know if I knew about any broadband services that I wanted to merge or buy. I give hime \$20mill and he tells me that I will not be sorry. I have never seen any income from that or any income from anything that I did before my so called 'stroke'. I opt for satellites specifically for these types of criminal cases. With a satellite it gives you the ability for complete control that way you can treat it just like a dvd or a VCR you can fast forward or you can rewind, given the correct time stamp and numbers you are able to listen or view all that is being said OR all that is being done to said victim. Like with my computer getting hacked you should be able to see the ip address that was activating my email accounts during my time at the hospital. Also with my late cell phone number you should be able to hear all that is being said before the number got compromised. 3362130819 in 2009. Given my natural physical bodily state it was my main mission to make wise decisions **because** I know that I would be unable to do so when I got older. I'm not that old now **BUT** I feel like an elderly man with two bad knees and zero stamina and it was all done by design. Just like my satellite surveillance it was done by design. Now I fear that if the leaders of the world don't take

action and start framing and turning on each other than this world we live in is worthless and a selfish world. How can I supposed to have faith when people tell me to keep the faith said with such glee on their face when I have lapsed their way of learning 20 years ago? How am I supposed to smile honestly with a 'Happy' face when I single handedly watched trillions of dollars grow and I recycle it in the world and those same very people deny me of living the life that my **FATHER** bestowed upon me? How am I suppose to wake up motivated daily when I know my life isn't going to get any better doing what I do? How am I supposed to go about living when I know I got a bomb leg and two bad knees? I'm the one who told you that the world is nothing but a butch of numbers compiled up to make sense of time.

I emailed you this earlier on my phone but was turned down-  
Hello,

My name is Devin LaTroy Hester and I am the reason behind anything digital dealing with the internet, however there was such an influx of income that honestly change the dynamics of the way business was done. Back in 1998 is mainly where I was in contact with everybody important, like major league people mostly because I brought attention to the loop holes in the coded world that was the internet. Another part was confidential information that I never broke, however dealing with other people with the same level of knowledge was scarce in 98-00. As you can imagine I procured a sizable amount of money that was taken from me throughout the leader or Time Warner Cable which is now Spectrum and a finance company where I had most if not all of my monies called Regal finance. It was Recency at that time but during their website update the name was changed and I

was conveniently forgotten. My ip and cell number mysteriously was hacked and everything was lost. Everybody wished me dead but that was not GOD's plan for me. Now I was also the reason we changed from cell phone towers to satellite and I also know how long their able to keep records, like ip numbers and cell phone numbers - [3362130819](https://www.fcc.gov/record/3362130819). Year of 2009 was when my life got overtaken. I copy written BIG ticket items like Facebook and Twitter but it was disregarded just as my life was. I am writing this letter to you to let you know when a man makes his worth there isn't a thing in this world to make him forget of where he stands. Or possibly there can be for the average man. Everything that I do I am not getting any kind of recognition from anything, I wrote and sang a host of songs in 2012 in Memphis Tennessee and I filed for copyrights on only two albums through Sony but communication stopped and I fear that is just going to be tallied up to another payment that I am being forced to not get. Right now I am getting nonsense phone calls and my bank account looks like I never did anything in my lifetime and that is untrue. I am the reason for everything but being mocked as ignorant. My SS# goes way farther than medical bills as I feared that my identity was stolen in that time frame as I was deadly stick in 2005 and was forced to stop my internet marketing. If anything happened during that time frame that was NOT me and needs to be justified. I am going to end this note and await yours and Sony's replies.

Thank You,  
Devin
